

## Distance Learning from the Math Experts

### Live, web-based math tutoring from Mathnasium

As current public health issues require families to begin distance learning, our new service, Mathnasium@home, allows students to continue to get the same face-to-face Mathnasium instruction you find in the learning center — from anywhere there's an internet connection.

Developed over the past several years for customers who had obstacles to bringing their children consistently into centers, over a thousand students have already found Mathnasium@home to be as effective as in-center learning. Our Center now offers this service to all our customers in an effort to help families weather the current school closures and social distancing protocols.

With Mathnasium@home:

- You get the same instructors and Mathnasium Method you know from our center, with real-time, face-to-face, web-based math instruction.
- Learning can happen anywhere there's an internet connection.
- You can smoothly transition your child to in-center learning at any time if you wish.

Call or email us to ask about Mathnasium@home. We can get your child set up right away.
